

Ground Support Equipment (GSE) Catalog

Purpose

The GSE Catalog helps users determine what equipment is required to support a specific Original Equipment product. The catalog provides users with a priced catalog of tools organized by Original Equipment item (i.e., list of tools to support a 300-xyz APU). In addition to the GSE Product/OE Product relationship, the catalog allows the development of a “shopping list” of GSE products based on either the GSE Part Number or the OE Product Information.

Key Features:

- Contains information about GSE products, limited information about Original Equipment Products and the relationship between them
- Search/list by GSE Part Number, Original Equipment Part Number, description or model number
- Available 24x7 via the Internet
- User registration and password authentication for information security and customer identification
- Provide detailed information for individual tools or for a group of tools, including a Illustrated Tool and Equipment Page formatted for printing
- Provides instant based on current arrangements with registered customers
- Designed for use by all GSE customers
- Allows the user to get a quotation for a list of GSE products

What's New in Release 7:

1. Self Registration – [Page 6](#)
2. End User & Product Entry – [Page 18](#)
3. Tool Usage Data – [Page 40](#)
4. Product Screening – [Page 41](#)
5. Removal of ROM Screen - [Page 28](#)

IGNITION COMPONENTS TEST UNIT
P/N LTCS10-14 01

DESCRIPTION:
THE GSE10-14 01 TEST UNIT IS USED TO TEST THE IGNITION SYSTEM. THE TEST UNIT HAS TWO TEST MODELS AVAILABLE FOR USE. THE TEST MODELS ARE THE GSE10-14 01 AND THE GSE10-14 02. THE GSE10-14 01 IS THE STANDARD MODEL. THE GSE10-14 02 IS THE GSE10-14 01 WITH THE GSE10-14 02 OPTION. THE TEST MODELS ARE AVAILABLE FOR ORDER THROUGH THE GSE10-14 01 PART NUMBER.

REQUIREMENTS:
Power Model (P/N 11-00000-1)
VDC 24V 100 hours
Warranty 200 hours
Input 250 hours
Output 250 hours
Power Source 250 hours

Unit Test Mode (P/N 11-00000-2)
VDC 24V 375 hours
Warranty 200 hours
Input 250 hours
Output 250 hours
Power Source 250 hours

GSE Catalog Use (Internet User) - Finding the Catalog

The GSE catalog is accessed from the Honeywell Aerospace Portal, Quotes & Ordering menu or directly using the URL www.honeywell.com/gse. On the GSS main page, move the mouse over the left navigation bar selection "GSE Catalog".

The image shows a sequence of screenshots from a web browser. The top screenshot displays the Honeywell MyAerospace homepage with a navigation bar containing 'HOME', 'PRODUCTS', 'SERVICES', 'QUOTES & ORDERING', 'SUPPORT', and 'HELP DESK'. A mouse cursor is positioned over the 'QUOTES & ORDERING' menu item. Below the navigation bar are several service tiles: 'Place an Order', 'Order Status', 'Service Center Ordering', 'Used Equipment', 'Get Price & Availability/RFO', 'RFO Status', 'Change an Existing Order', and 'Ground Support'. A blue arrow points from the 'Ground Support' tile to a second screenshot.

The second screenshot shows the 'Ground Support Equipment' page. A blue arrow points from the 'GSS Catalog' link in the left-hand navigation menu to the 'Aerospace Catalog' link in the main content area. The navigation menu includes 'HOME', 'ABOUT US', 'PRODUCTS & SERVICES', 'INDUSTRY EXPERTISE', 'TECHNOLOGY', and 'NEWS & EVENTS'. The main content area features a header for 'Honeywell Aerospace' and 'Ground Support Solutions', followed by a section titled 'Support Solutions on Land, On the Sea, or In the Air' with an image of ground support equipment and descriptive text.

The third screenshot shows the 'Aerospace Catalog' page, which is partially visible on the right side of the image.

GSE Catalog Use (Internet User) - Log In for Existing Users

To use the catalog, a user must first log-in. Users must pre-register with GSS to get a username and password that can be used on the site (this is not the same username used for Portal access). If you are a registered user, please enter your username and your password then select "Login" to log-in to the GSE systems. If you are not a registered user, select "New User Instructions" and follow the next series of steps to request access.

GSE Catalog & Quotation System Registration Instructions

Thank you for your interest in our Catalog & Quotation System. This system has been developed for use by Honeywell to support our Ground Support Solutions customers worldwide. To use this catalog, customers must register with the GSS Team.

A self-registration process has been developed to speed your access to Honeywell information while still providing evaluation of the applicable business relationship. It is the policy of Honeywell to limit distribution of maintenance materials to only direct users of the supported prime equipment. As a result of this policy, we do not provide ground support equipment for third party uses unless a valid licensing agreement is in place. To confirm this in the registration process, we ask the following questions:

- What product(s) do you need GSE for?
- Do you have an existing license that has not expired? (Have information ready.)
- Are you the owner/operator of the aircraft using these products?
- Who is the OEM of the aircraft using these products?
- Is this for use on your own fleet?

Based on your answers to these questions, the self-registration process may provide a login account for the system. If provided, this account will allow you to use the Catalog to get quotations (subject to additional usage screening). Information provided will be verified prior to Honeywell accepting any order for quoted items.

Then continue...

GSE Catalog Use (Internet User) – New User Registration

The Registration form gives the user a place to enter user, company and license information. Personal and Company information is required, the Business Relationship information may be entered at a later time.

Pop-up boxes on the screen (“under” the ? Icons) give further information about the selections. Some of the boxes will automatically check our databases for valid data – see the following pages for details.

This information is used by Honeywell only to administer the IQ system and the relationship between Honeywell and our customers. Email addresses are used to deliver quotations generated either manually or automatically. If you would prefer not to get the quotations, please contact your buyer. More information about Honeywell's privacy policy on the Web can be found on our [Privacy Statement](#) page.

GSE Catalog Use (Internet User) – New User Registration

The email address is used as the username and thus cannot be duplicated. When the user is entering their email address, the application is checking our user database. If the user types an email address that is already in the database, an error message is displayed.

The screenshot shows a registration form with the following fields: Extension, Fax, * Email, and * Initial Password. The * Email field contains the value 'joe.johnson@aircraftmagic.com'. A yellow error box is displayed over the * Email field with the text: 'That email already exists in the system. If you have forgotten your password, please contact your sales agent.' The * Initial Password field is empty.

Passwords have been strengthened in this version and the application checks passwords that are entered against a set of rules. When the password does not match the rules, an error message is given. The verification entry is also checked against the initial entry. A limited email validation (primarily to catch obvious typing errors) is included on this form.

The screenshot shows a registration form with the following fields: * Email, * Initial Password, * Verify Password, Fax, and * Email. The * Email field contains 'fred.fisher@aircraftmagic.com'. The * Initial Password field contains seven red dots. The * Verify Password field is empty. The Fax field contains '222-333-4444'. The * Email field contains 'fred.fisher#'. A red error box is displayed over the * Email field with the text: 'Please enter a valid email address.' Below the * Initial Password field, a red error message reads: 'Your password must be between 6 and 15 characters long. It must contain at least one number and one character with either an uppercase letter or punctuation.'

The screenshot shows a registration form with the following fields: * Initial Password and * Verify Password. The * Initial Password field contains seven black dots. The * Verify Password field contains five red dots. A red error message below the * Verify Password field reads: 'Passwords do not match'.

* Indicates a required field

GSE Catalog Use (Internet User) – New User Registration

To reduce the number of duplicate entries in our database, the application checks our database of companies as the user enters the company information. The check is based on name, address and city, so a check is run when all three are entered. Any existing companies whose information is similar to what is entered is displayed. When the user selects an existing company, that company information is selected and locked in (no changes are allowed on this screen). A reset is provided to clear pre-selected company information.

Company Information

* Company Name

Some existing company records have been found that are similar to your company. Please select an existing record if appropriate.

- Aircraft Magic: Runway, NY
- None of these.

* Address

* City

Company Information

* Company Name

* Address

* City

* State

* Postal Code

* Country

GSE Catalog Use (Internet User) – New User Registration

The lower table on the registration form allows the user to pre-load license information. This information will be used during the quoting process. As the product information is typed in, the application checks our database and returns products that might match the users entry. A similar feature is included for aircraft type. Note that aircraft type includes both model number and OEM selections.

Business Relationship

This section will pre-load the database of license information required for your use of Honeywell Intellectual Property. Please provide current license information your company has in place with Honeywell. The GSS Quotation System will use this information to ensure that the appropriate licenses are in place, or to identify new licenses required. Product information will also be used to help confirm GSE applicability to that Honeywell product.

Product

To search for a product, begin typing the model number in the text field.

License

Enter the number or identification text from the license document. If there is no number or obvious identification, use a title or other descriptive text which reflects the purpose of the license.

Expires

Type in the date of expiration in the format mm/dd/yyyy, or use the calendar to select the date.

Own/Operate

Check this box if you own or operate the aircraft this product will be installed on.

Aircraft

The aircraft this product will be installed on. To search for an aircraft, begin typing the model in the text field.

My Fleet

Check this box if this request is for work on your own fleet. If the box is not checked (for work on third-party aircraft), you must have an MRO agreement and must provide that number in the license field.

GSE Catalog Use (Internet User) – New User Registration

After submittal, the application performs a basic red-flag country screening and returns either a rejection message/email or a welcome message/email. The rejection message is shown below and the acceptance message is shown on the next slide. On a rejection message, the user is given the option to contact us using a customized contact sheet.

GSS Catalog & Quotation System Registration

Due to the current global environment it is not possible to obtain an export approval for your company based on the U.S. Government countries list restrictions. Therefore, we will be unable to grant you access to our on-line catalog or provide quotations. If you would like more information regarding U.S. export rules and regulations or the U.S. Government embargo country list please visit the websites listed below.

<http://www.bis.doc.gov/> (Commercial Items)

<http://pmdtc.org/> (Military Items)

At this time, your request is denied. If you would like to discuss this request and result, please contact us using the information given on the [contact sheet](#)

GSS Contact Sheet

Please contact us by phone or email. This page has been designed to automatically send the detailed information to the Administrator shown below. Add your comments in the input field then click the "Send Email" button.

GSE Catalog Use (Internet User) – New User Registration

If the user passes the red flag screening, they are set-up in the database, a confirmation screen is displayed and a “welcome” email is sent. The welcome email has a copy of the IQ User’s Manual attached to it. This ends the registration process and the user may now use the “Login” option on the menu bar to start the Login process.

GSS Catalog & Quotation System Registration

Welcome to the Honeywell Ground Support Solutions Instant Quote Catalog. You have just successfully self-registered to gain access to our Instant Quote Catalog. You will receive a welcome email shortly that contains all the information on this page.

Your username is: fred.jones@aircraftbrothers.com with the password you just created.

The external (Internet) website is <http://www.honeywell.com/gse>. Operation of the system is generally self-explanatory, but please let me know if you have any questions that are not covered in the User's Manual (attached to your welcome email) or the Help screens.

When formal quotes are requested, the IQ system will do the following:

- Check to see if we have current pricing that can be automatically quoted
- Break the list of parts requested up into one that can be automatically quoted and one that cannot be automatically quoted.
- If your list contains parts that cannot be automatically quoted then they loaded into our internal quoting system and put into our queue to be processed in the order received. Once pricing information becomes available a quotation will be automatically emailed to you.

We are continuing to update the content in this catalog with both informational items (pictures, isometrics, text) and pricing. If you see something missing that you need, please let us know so we can add the requested information to the catalog. For changes to the content of the catalog (extensions, omissions, errors, etc.) please contact us at gse@honeywell.com.

If you have questions about website operation, quotes or the purchasing tools, please contact us:

[Access the GSE Catalog on the Internet at www.honeywell.com/gse](http://www.honeywell.com/gse)

GSE Catalog Use (Internet User) - Main Catalog Page

After the user has logged-on, the application usually displays the main page of the GSE catalog. From this page, the user can select items either by GSE Part Information (Tool Part Number, Description, Activity) or by Original Equipment (OE) Item information (Model Number, Outline/Part Number, Description). The upper box is for GSE Part Information and the lower box is for OE Item information. The user may also browse for tools using the “Browse by Tool Pictures” option on this page.

The screenshot shows a Microsoft Internet Explorer browser window displaying the Honeywell GSE Catalog Main Selection Page. The browser's address bar shows the URL: https://content.honeywell.com/gse/CatalogExt/Catalog_Main_Page.asp. The page header includes the Honeywell logo and the text "Ground Support Equipment Instant Quote - On-Line Parts Catalog". A navigation menu contains links for "GSE Home", "Main Catalog", "PN List Entry", "Shopping Cart (0)", and "Your Info".

The main content area is titled "GSE Catalog Main Selection Page" and features a "Browse by Tool Pictures" link. Below this, there are two primary search sections:

- Search by GSE Part Number and Description:** This section includes a search input field, three buttons labeled "Part#", "Activity", and "Description", and an "End User:" field with the value "tCustC1" and an "UPDATE" button. Below the "End User:" field is a "Product:" field with a note: "To change the end user or product, begin typing the new information and select from the options that drop down. Note that product only needs to be entered if you are requesting a quote for parts not in a product list."
- Search by Original Equipment Part Number and Description:** This section includes a "Filters" dropdown menu set to "All" (Class), a "Select-Class" button, and a red text prompt: "I have a list of parts and I want a formal quotation for them". Below this is a "Search" input field and buttons for "Model#", "Outline#", "Description", and "Reset Search".

A blue text note below the search sections reads: "Cumulative search method used - Repeated search selections act on previous results. Use Search Reset to begin a new search".

At the bottom of the page, there is a small icon and the text "GSE is an ISO 9001 Registered Firm". The footer contains navigation links: "GSE Home | Main Catalog | PN List Entry | Shopping Cart (0) | Your Info | Logout |" and a copyright notice: "Copyright Honeywell International Inc."

GSE Catalog Use (Internet User) - Main Catalog Page

If you will be entering a list of part numbers (using the PN List Entry or “I have a list...” links), use the End User / Product entry page brought up by those links. See section 9 for more information about entering a list of part numbers.

The End User/Product entry block on the Main Catalog Page is used when searching for GSE Part Numbers or when Searching by Original Equipment Part Numbers.

After log-in, the End User is pre-set to be the customer that logged in. If the quotation is to be generated for use at another site or company, note that information in the End User field. As the End User name is typed, the application will try to match information that is already in the database.

If you will be entering individual GSE part numbers (searching by GSE Part Numbers), please indicate which product these tools will be used with (searches by model number or outline number). The “Update” button saves the “End User” and “Product” selections.

2. Select the field to look in (one at a time). You may look for information by Part Number, Description or Activity (Activity where tool is used, like assembly, disassembly, etc).

GSE Catalog Use (Internet User) - Search by GSE Part Number (Continued)

Once the search is complete, the results are displayed in a grid form, sorted by Part Number. The grid may be re-sorted by clicking on the column headers. Sorts toggle between ascending and descending when the header is clicked. When the “+” sign is selected, an evaluation of the authorization information on-file will be done based on the End User and Product selected. If this end-user has a license or usage on record that allows quote and order of this product, the part will be added to the cart. See the “Product Screening” section for more information on this process. The “+” sign will change color to indicate that the part has been added to the cart. Clicking the sign again (when it is “-”) removes that item from the cart. The part information page may be accessed by clicking on the Part Number link in the grid.

Cumulative search method used - Repeated search selections act on previous results. Use Search Reset to begin a new search

GSE Catalog Use (Internet User) - Search by OE Product Information (Continued)

Once the search is complete, the results are displayed in a grid form, sorted by Part Number. The grid may be re-sorted by clicking on the column headers. Sorts toggle between ascending and descending when the header is clicked. When the “+” sign is selected, an evaluation of the authorization information on-file will be done based on the End User and Product selected. If this end-user has a license or usage on record that allows quote and order of this product, the group of parts will be added to the cart. See the “Product Screening” section for more information on this process. The “+” sign will change color to indicate that the parts have been added to the cart. Clicking the sign again (when it is “-”) removes the tools associated with that OE Item from the cart. The tool list for a specific OE Item may be accessed by clicking on the Model Number link in the grid.

GSE Catalog Use (Internet User) - Search by OE Product Information (Continued)

The tool list gives a listing of the GSE equipment required to support the OE Item selected. The default view is called "Small Shop" which shows the minimum number of tools needed to support this product. Information regarding quantity (max needed during any operation), maintenance level, sub assembly and activity are coded in the table (legend at bottom). If the user needs a quote for a sub-set of the full list, the list should be put in the shopping cart (from the Main Page) and can then be adjusted in the shopping cart. In addition to the list of tools, the tools are available in a "list of pictures" format. The document summary shows the reference data (such as the CMMs) used to create the tool list. If desired, the entire Illustrated Tool & Equipment manual can be generated in a format suitable for printing.

The tool list includes the capability of another view, called "Full Shop". This view gives a listing of the GSE equipment required to support the OE Item selected in a high volume shop. Parts are grouped by the part of the OE Product that they support and the activity they are used for. Quantities shown are those recommended for a full shop with workstations for each sub-assembly and activity.

GSE Catalog Use (Internet User) - Part Detail Page

Each part has a part detail page that shows all the information available for that part number. This information includes:

- Description and Part Number
- Application/Function of this part for the OE Product selected (if no OE Product was selected, this will be the general description of that part).
- Envelope dimensions and weight
- Power Source requirements
- If a brochure is available, a link to that brochure will be displayed.

Note: A link is provided that generates a printer-friendly page.

The screenshot shows the Honeywell GSE Catalog interface in Microsoft Internet Explorer. The browser address bar displays the URL: <https://content.honeywell.com/gse/CatalogExt/ItemListDetail.asp?PartDetail=834823-1&OEPred=21&CEAct=112>. The page header includes the Honeywell logo and navigation links: GSE Home, Main Catalog, PN List Entry, Shopping Cart (0), Your Info, and Logout. The main content area is titled "Fan Support Assembly" and lists the Part Number: 834823-1. The Application/Function is described as "Used to support housing and shaft." Under "More Information", there is a "View Brochure" link. The Dimensions section lists: Width: 8 inches and Height: 5.62 inches. A photograph of the part is displayed, with a "Show Line Art" link above it. A "Printer-Friendly Page" link is also visible. A blue arrow points from a note box to the "Printer-Friendly Page" link, and another blue arrow points from the same note box to the photograph of the part.

Request a Quotation

If the part will be re-sold, update this field to reflect the end user.
Begin typing any part of the company name to search. Select a result (click or tab) from the resulting list before going to another field.

End User:

Select the Honeywell product you will be maintaining with these item(s). Begin typing any part of the Honeywell product model number or part (outline) number (found on the cover page of the User's Manual) to perform the search. Select a result (click or tab) from the resulting list before going to another field. If that product is not in our database, the system will ask for the Model Number, Part Number and Pub Number to help us evaluate your request.

Model Number: *(When searching, enter either OE Model or OE Part(Outline) Number)*
(Model Number Format: 131-9A, CTA-81A, LRU, 3070800)
(Part (Outline) Number Format: 3800818-1, 071-015-2801, 3038111-ALL)

If the product selected is not in our database, the system will request further information to make sure we can identify the product being used:

We cannot not find that product in our database. Please enter additional information before continuing.

Part Number: *(Part (Outline) Number Format: 3800818-1, 071-015-2801, 3038111-ALL)*

Pub Number: *(Pub Number Format: 72-02-15, 1-2840-265-2, 34-45-10)*

When the Continue button is selected, the End User & Product information will be compared to the authorization information on-file. If this end-user has a license or valid usage on record that allows quote and order of this product, the part entry page will be displayed. See the "Product Screening" section for more information on this process.

IQ System User's Manual - Internet Catalog User - Get quote for list of parts (continued)

If the evaluation is successful, the application moves on to the part entry page. This page shows the user and authorization information used for the evaluation and shows the part entry grid. In the grid, the user enters the desired part number(s) and quantities.

If more lines are needed, the Add button allows the addition of a specified number of extra rows. As the part numbers are entered, they are automatically evaluated and the results displayed. See the next slide for more details on the messaging format. When all the part numbers are as desired, use the "Add to Cart" button to put these parts in the shopping cart.

IQ System User's Manual - Internet Catalog User – Product Screening

As part of the quote process, the user must identify the end user (if the GSE is not for their own use) and product this GSE will be used to support. The end user and product information will be used to evaluate GSE usage on that product and to confirm that this user has the correct arrangements in place to use the GSE.

Request a Quotation

If the part will be re-sold, update this field to reflect the end user.
Begin typing any part of the company name to search. Select a result (click or tab) from the resulting list before going to another field.

End User:

Select the Honeywell product you will be maintaining with these item(s). Begin typing any part of the Honeywell product model number or part (outline) number (found on the cover page of the User's Manual) to perform the search. Select a result (click or tab) from the resulting list before going to another field. If that product is not in our database, the system will ask for the Model Number, Part Number and Pub Number to help us evaluate your request.

Model Number: *(When searching, enter either OE Model or OE Part(Outline) Number)*
(Model Number Format: 131-9A, CTA-81A, LRU, 3070800)
(Part (Outline) Number Format: 3800818-1, 071-015-2801, 3038111-ALL)

The user enters the end user name (by default, it is set to the logged-in customer) and product information in the boxes provided. Each box will automatically compare what is entered against what is in the database and will provide selection assistance.

If the product entered by the user is not in the database, the system will ask for more information.

We cannot not find that product in our database. Please enter additional information before continuing.

Part Number: *(Part (Outline) Number Format: 3800818-1, 071-015-2)*

Pub Number: *(Pub Number Format: 72-02-15, 1-2840-265-2, 34-45-1)*

Product: *(131-9A, CTA-81A, LRU)*

Product: *(131-9A, CTA-81A, LRU)*

IQ System User's Manual - Internet Catalog User – Product Screening (continued)

When the user continues, the license and usage information will be evaluated to determine if the correct business arrangements are in place for the sale and use of this GSE. If they are, the system will proceed to the part entry page, shopping cart or quote page depending on user request. If not, the user will be asked for more information about existing licenses or usage.

Request a Quotation

We could not find valid license information required for your use of Honeywell Intellectual Property. Please add information for any current licenses your company has in place with Honeywell. If you do not have a current license in place with Honeywell, please contact your [Honeywell sales representative](#).

Product: PriceTest1 - Pricing1
Company: South Bend

If license information is available, fill in the number and expiration date (must be in the future).

License No.: ?

License Exp: ?

If no license information is available, complete the following information about your usage of this product.

Aircraft: ?

Own/Operate: ?

My Fleet: ?

If no license information is available, complete the following information:

Aircraft: 737 ?

Own/Operate: 737-100/200/200F

My Fleet: 737-300/300F
737-400/400F
737-500
737-600

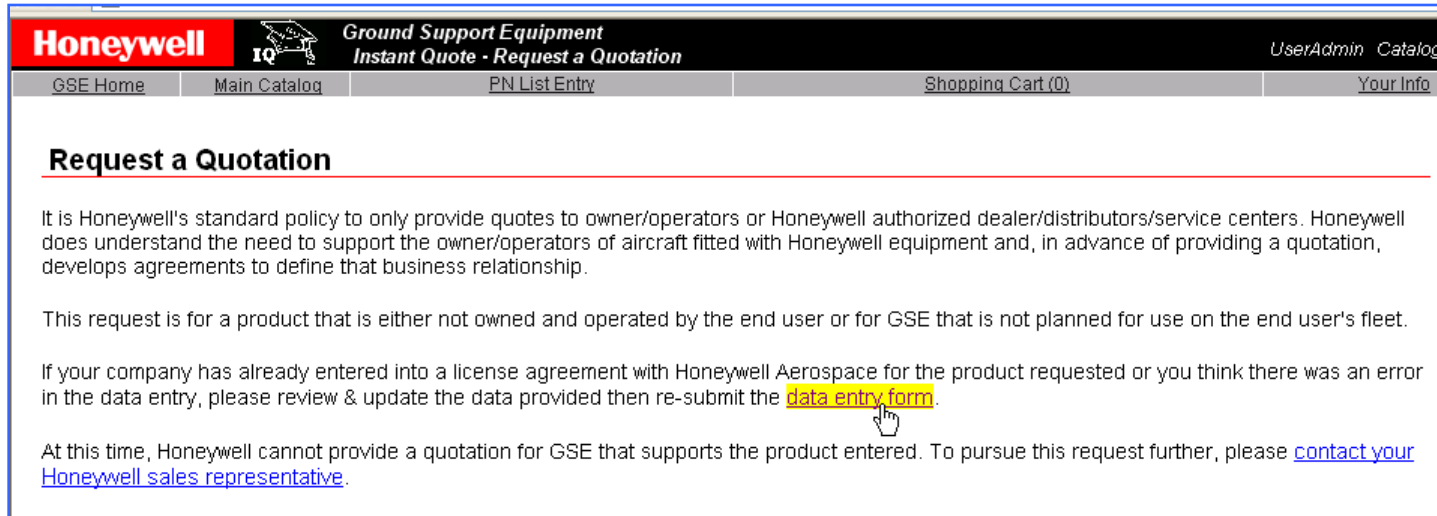

On this screen, the user must enter a license number and expiration date (direct or using calendar pop-up) or the usage information: aircraft, owner/operator and “use on my fleet” (aircraft matches entry with existing database values).

After the “Continue” button is selected, the information provided is saved then re-evaluated. If the information does not resolve to pre-existing business arrangements, the system will not allow on-line quoting.

IQ System User's Manual - Internet Catalog User – Product Screening (continued)

If pre-existing business arrangements cannot be identified, the user is given two options 1) Checking and re-entering the authorization information or 2) Contacting Honeywell to discuss the situation and confirm or create the proper arrangements.

To return to the data entry form, the user must select the “data entry form” link.

The screenshot shows the Honeywell IQ system interface. The top navigation bar includes the Honeywell logo, the IQ logo, and the text "Ground Support Equipment Instant Quote - Request a Quotation". On the right side of the navigation bar, there are links for "UserAdmin" and "Catalog". Below the navigation bar, there is a secondary menu with links for "GSE Home", "Main Catalog", "PN List Entry", "Shopping Cart (0)", and "Your Info". The main content area is titled "Request a Quotation" and contains the following text:

It is Honeywell's standard policy to only provide quotes to owner/operators or Honeywell authorized dealer/distributors/service centers. Honeywell does understand the need to support the owner/operators of aircraft fitted with Honeywell equipment and, in advance of providing a quotation, develops agreements to define that business relationship.

This request is for a product that is either not owned and operated by the end user or for GSE that is not planned for use on the end user's fleet.

If your company has already entered into a license agreement with Honeywell Aerospace for the product requested or you think there was an error in the data entry, please review & update the data provided then re-submit the [data entry form](#).

At this time, Honeywell cannot provide a quotation for GSE that supports the product entered. To pursue this request further, please [contact your Honeywell sales representative](#).

To contact Honeywell, either contact your local sales representative or use the “contact” link. This link will take you to a form that allows you to: 1) Enter additional information and 2) Send an email to your Honeywell GSS contact.

This email is pre-formatted with detailed information about this specific RFQ session which will help the GSS contact to take action on this RFQ.
